

## PROPERTY TAX ASSESSMENT REVIEW - U.S.

DMA performs Assessment Reviews to identify opportunities for reducing real and personal property tax assessments. DMA’s comprehensive review is customized to your specific needs, and we focus on reducing both current and past assessments. Our property tax professionals will review your entire portfolio of properties or individual properties of concern to you. Both real and personal property tax assessments are scrutinized to determine the accuracy of the data used by the taxing authority, valuation issues, state-specific treatment of property, and overlooked exemptions. We communicate the results of each property’s review and, with your approval, take all necessary steps to implement the assessment reduction strategies available, including refund recovery.

DMA’s property tax professionals have generated billions of dollars in real and personal property tax savings. We are leaders in identifying industry-specific issues having an impact on value. Our property tax professionals have reviewed thousands of assessments in nearly every jurisdiction. DMA’s national scope and jurisdictional expertise means our clients realize the maximum benefit available.
